Crafted by us Created by Nature

We travel across Europe to source the highest quality wood. Over the years, we have built an extensive network, allowing us to obtain almost all of our material directly from the source.

From old oak wine press beams from Bosnia to floorboards from a dismantled grain barn in Ukraine: we purchase, sort, and process recycled wood, distributing it to our customer base across Europe.

Our approach is highly valued by many customers. We are straightforward,

clear, honest, open, and dedicated. We do everything we can to ensure our customers are fully satisfied.

Thanks to the extensive knowledge and experience of our team in reclaimed wood, we are able to deliver high quality at a fair price.

BARNWOOD FACADE CLADDING

Barnwood cladding adds rustic charm to any outdoor space. Made from reclaimed wood, it offers a unique appearance, durability, and resistance to the elements. This way, you can give your home a characterful, timeless look.

BARNWOOD WALL CLADDING

Barnwood wall cladding brings a warm, rustic charm to any interior space. Made from reclaimed wood, it features a unique appearance with characteristic grooves and natural color variations. Additionally, our wall cladding is easy to install.

BARNWOOD SHEET MATERIAL

Barnwood sheet material is versatile and perfect for a variety of interior applications. It is commonly used for creating cabinets, kitchen fronts, or walls. Since the panels are produced in fixed sizes, they are easy to cut to the desired dimensions.

BARNWOOD FLOORBOARDS

Barnwood floorboards radiate authenticity and warmth. Made from reclaimed wood, they feature unique textures and colors that add character to your interior. In addition to their beautiful appearance, they are also highly durable!

BARNWOOD DOORS

Barnwood doors are a stunning addition to any interior, thanks to their unique, rustic appearance and characteristic grooves. Made from reclaimed wood, they bring warmth and charm to any space. We offer both interior and exterior doors.

BARNWOOD STAIR TREADS

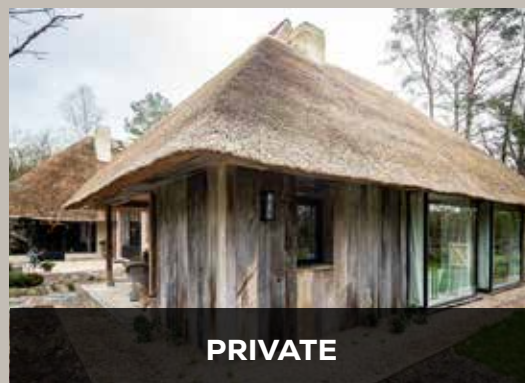

Barnwood stair treads bring rustic charm and warmth to any staircase. Made from reclaimed wood, these treads are not only stylish but also durable and sturdy. The unique textures and colors of the barnwood give each tread its own distinctive, characterful look.

PROJECTS WORLDWIDE

MONTENEGRO

In sunny Montenegro, we had the opportunity to supply approximately 200 recycled old oak beams and an exclusive bar cladding. On vacation in beautiful Montenegro? Be sure to visit 'Playa Maria'!

BELGIUM

For a private project in Brasschaat, we had the privilege of supplying facade cladding, stair treads, and old oak beams. These high-quality materials were carefully selected to highlight the unique charm and character of the project.

HISTORISCH HOUT GOES GLOBAL

We are proud to have completed a wide range of projects, both small and large, in various countries around the world. Our expertise lies in delivering high-quality recycled products made from reclaimed wood, including floors, doors, stair treads, sheet material, wall cladding, and facade cladding. We have carried out projects in countries such as Hungary, Austria, England, Norway, and South Africa.

Thanks to our craftsmanship and passion for sustainability, we bring the unique charm of historical wood to customers worldwide.

BUSINESS

LUXEMBOURG

For a hospitality project in Luxembourg, we supplied our “Innsbrück Brown” barnwood ceiling and wall cladding. These high-quality materials were chosen to create a warm and inviting atmosphere in the spa areas.

BUSINESS

SWITZERLAND

For a hospitality project in Switzerland, we had the opportunity to supply our “French Oak” barnwood. We produced a parquet floor from this, adding a unique charm to the ambiance of the restaurant.

CATALOG

SUMMARY

We offer an extensive catalog of barnwood types, featuring a variety of colors, textures, and appearances. Our diverse wood species have a rustic, natural look and are available in various finishes to suit different interior and exterior styles. Our barnwood collection combines the charm of reclaimed wood with the durability of recycled wood, making it perfect for a wide range of interior and exterior applications. Some of our barnwood types are available in both solid pieces and semi-finished products (tailor-made).

Barnwood "Belgrade" consists of old oak planks, made from weathered oak floorboards that are decades old. These planks come from old military barracks and former grain storage facilities deep in the mountains of the Balkan countries.

The wood, which has been heavily walked on, has developed a rich history over the years and is full

of character. The planks are smooth-planed on the back, while the original patina side has been carefully brushed to remove dirt and splinters.

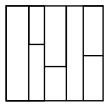

Old nail holes, structural holes, and open knots give this barnwood its unique appearance. In addition to its beautiful, authentic look, this wood is also an extremely durable choice!

Lengths: 80-230 cm mix

Profiling: no

Tailor Made: yes

Decades-old field barns, often older than ourselves, are the source of our barnwood type "Zagreb." Due to years of exposure to the elements, these planks have developed beautiful deep grooves and a distinctive, weathered appearance. Unique widths of over 30 cm are not uncommon! During the demolition of the barns, the old oak planks are carefully stripped of nails and selected based on quality and length. Our barnwood type "Zagreb" has a less coarse

appearance than our "Sarajevo" type.

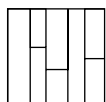

Barnwood "Zagreb" is not only a stunning wood type but also a sustainable choice. The old oak wood gets a second life and adds a warm, authentic atmosphere to any project. Barnwood "Zagreb Grey" is often used for exterior applications. This wood type is also available in brown tones. For this, check out our barnwood type "Zagreb Brown."

At Historisch Hout, we import barnwood from authentic grain barns and wine presses in the Southeastern Balkan countries. These often over 150-year-old, abandoned barns are purchased from local managers and carefully dismantled by hand. Each old oak plank tells its own story, making every piece unique. Our barnwood "Sarajevo" is a beautiful old oak wood with a weathered character.

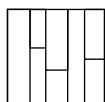

This barnwood is characterized by cracks, knots, and unique color variations, giving your furniture, flooring, or item a distinctive, historical appearance. With barnwood "Sarajevo," you bring a piece of tangible history into your home. At Historisch Hout, sustainability is at the heart of what we do. Our barnwood "Sarajevo" not only has a robust look but is also a sustainable product.

Exterior Doors: W: 60-120 cm | T: 50-56 mm | H: 170 - 280 cm

You've probably seen them before, either in real life or in pictures: old barns, farms, and mountain huts high in the Alps. These barns, often older than ourselves, are used in the summer to store food for the livestock during winter. Due to the extreme weather conditions at high altitudes, the softwood planks have developed beautiful, deep grooves. The intense sun, both in summer and winter, creates unique color patterns in the wood. This gives the planks a black-grey to light brown color, often referred to as "Sonnengebrant."

We carefully sort these planks by brown and grey tones.

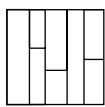

When the barns are due for renovation or demolition, we purchase them. The barns are then dismantled, and the wood is transported to the Netherlands. Once it arrives, the wood is placed in the drying chamber. Here, our barnwood "Innsbrück" is carefully dried to make it suitable for use in interiors. The drying process also prevents potential issues with insects.

These floorboards are made from recycled pine wood, often sourced from old houses, barns, or factories.

They bring a unique, authentic atmosphere to any interior. The old pine floorboards are carefully selected from demolition projects of historic buildings. After collection, the planks are thoroughly inspected for quality, planed, and, if necessary, reworked to make

them suitable for modern flooring applications.

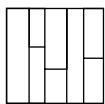

Our "Kirchberg" barnwood type features a characterful appearance, marked by natural aging, cracks, grain patterns, and discolorations, making it a timeless addition to both classic and modern interiors.

Old hand-hewn pine beams are beautiful, durable building materials highly valued for their distinctive appearance and historical significance. These beams often come from old farms, barns, or other buildings and can be hundreds of years old. Over time, they have developed a rich patina, giving them a unique and rustic look. In the past, before the rise of machine woodworking, trees were felled and shaped by

hand. This was done using traditional tools such as axes and chisels. The hand-hewing of beams was a time-consuming and labor-intensive process, where craftsmanship played a crucial role. The traces of this craftsmanship are clearly visible in the beams: irregular shapes, rough surfaces, and uneven edges tell the story of the people who once worked on them by hand.

Historisch Hout offers a wide range of authentic wine press beams from an impressive stock. These old oak beams have served for many years as solid outer walls of wine presses and farmhouses in Southeastern Europe.

Due to decades of exposure to the elements, the beams have taken on their current shape. With their rectangular form, they are perfectly suited as old oak purlins. The beams are typically 7-12 cm thick and about 20-25 cm high. Available in lengths of

up to 500 cm, they are ideal for use in traditional oak constructions. With these beams, you can create a rustic, country-style aesthetic.

In addition to being used as structural timber, we often saw the wine press beams into smaller pieces. From these, we produce barnwood types "Sarajevo" and "Zadar" in various thicknesses. Since the oak wood has been able to dry naturally in the wind for many years, it is stable and perfectly suited for interior construction.

16x16 / 18x18 cm	24x24 / 26x26 cm

Historisch Hout specializes in the sale of old oak beams. We travel throughout Europe to source the finest beams and planks, offering a unique selection of timber frames in various sizes. In our own workshop and sawmill, the beams can be processed in different ways. We can remove nails, brush, plane, and resaw them to the desired dimensions.

Our range includes beams with diverse appearances: from highly weathered to almost smooth and square. Some frames even feature authentic wood carvings.

There are many variations in processing, appearance, origin, and age of the old oak beams. Old oak wood has an authentic, warm appearance. Since the wood has dried naturally for decades, it is more stable than fresh oak.

Because the beams often come from the demolition of old grain barns, farmhouses, and country houses, reusing old oak in new construction projects is a sustainable way of building.

Ship planks have served as cargo floors in cargo holds for decades, giving them an authentic appearance.

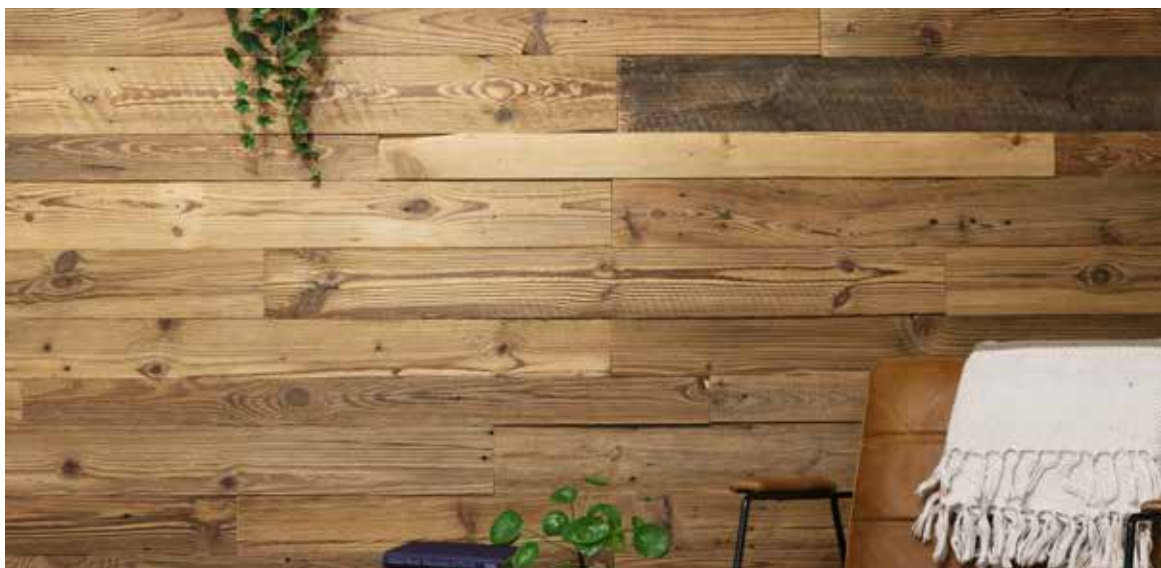

Azobé wood is known for its exceptional hardness and is virtually rot-resistant (durability class 1). This wood species is widely used for sustainable decking boards.

Due to their long use as cargo floors, the planks have acquired a rugged look. We are one of the few suppliers in the Netherlands offering this material both to individuals and businesses. Our ship planks are sold exclusively sorted and brushed!

Old oak wood has a natural charm and tells a story. The reclaimed wood used for these prefab wall panels comes from old structures such as barns, houses, or factories. This sustainable material is given a new life by transforming it into wall cladding.

These unique wall panels consist of individually cut blocks of solid old oak wood that together create a three-dimensional effect. This type of cladding

combines the natural warmth and durability of oak wood with a modern appearance. The square blocks are playfully arranged, creating a dynamic pattern with varying depths. This depth brings the surface to life.

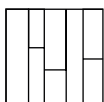

Thanks to the natural grain, color variations, and textures of the oak wood, the cladding has a warm, organic look. This makes the 3D wooden cladding suitable for various interior styles.

SPECIFICATIONS FOR SEMI-FINISHED PRODUCTS

Thickness: 12 mm panel + 10 - 15 mm oud eiken

Width: 60 cm

Length: 120 cm

Profiling: no

Tailor Made: yes

Old oak wood has a natural charm and tells a story. The reclaimed wood used for these prefab wall panels comes from old structures such as barns, houses, or factories. This sustainable material is given a new life by transforming it into wall cladding.

The 3D wall panels are made from old oak slats that are cut into various widths and lengths. The slats are then brushed and planed before being carefully

mounted onto a panel. What makes this 3D cladding special is the use of oak slats in different sizes.

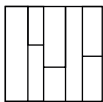

Because the slats vary in width and length, a lively and playful pattern is created on the wall. The variation in size and depth of the slats enhances the three-dimensional effect. In addition to differences in width and length, the slats also vary in texture—some are planed, while others are brushed.

SPECIFICATIONS FOR SOLID WOOD

Thickness: 12 mm panel + 10 - 15 mm naalddhout

Width: 60 cm

Length: 120 cm

Profiling: no

Tailor Made: yes

Have you already discovered our Barnwood 3D "Zillertal"? Old pine wood has a natural charm and often tells a story. The wood used for these prefab wall panels comes from old structures such as barns, houses, or factories. This sustainable material is given a new life by transforming it into wall cladding.

Our Barnwood 3D "Zillertal" consists of slats from our barnwood type "Zillertal," which have been cut into various widths and lengths. These slats are mounted

onto a stable panel, making the 3D wall cladding easy to install. The varying dimensions of the slats create a dynamic pattern when placed on the panel. The combination of different sizes and heights enhances the three-dimensional effect.

With its natural wood grain, color variations, and textures, this reclaimed softwood cladding brings a warm, organic look to any space.

BARNWOOD PANELS

Our barnwood panels bring the authentic charm of old wood to your interior. Made from recycled wood, these panels have a unique appearance with characterful grains, color variations, and rough textures. Our panels are ideal for commercial

contractors, such as in interior construction. By working with panels, you can work quickly and efficiently. With their sustainable and eco-friendly origins, our barnwood panels not only add style but also a story of reuse and craftsmanship.

BARNWOOD

FACADE CLADDING

Looking for oak wood cladding with character? You've come to the right place. We have a large selection of oak and softwood, perfect for exterior cladding. Our barnwood cladding comes from decades-old field barns, often older than ourselves.

Due to the test of time and the extreme weather conditions that the barns have withstood over the years, the barnwood boards have developed beautiful deep grooves and a lived-in appearance.

Thanks to the impressive textures, the wood has a stunning, natural look. After the barns are dismantled, the oak wood is

exported to the Netherlands, where it first enters the drying chamber before being carefully selected for quality and length.

The wood is then prepared for exclusive wooden cladding. In addition to its beautiful appearance, the oak cladding also has a long lifespan.

What is barnwood cladding?

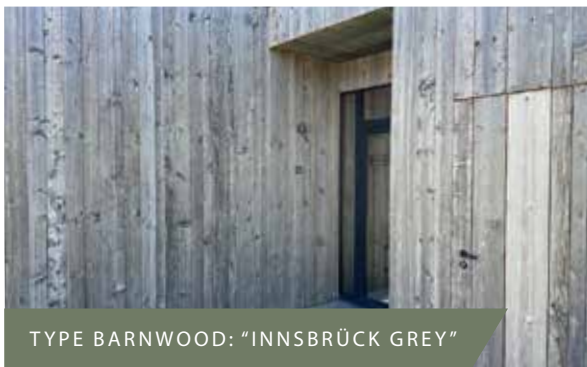

Barnwood is a term used for old softwood and oak wood, originating from old field barns and mountain huts. This wood was once used for cladding. Due to weather influences, the wood is marked by the elements, resulting in a unique color and texture.

BARNWOOD

WALL & CEILING CLADDING

Are you looking for wall and ceiling cladding made from old, weathered wood that is easy to install? Then our wall & ceiling cladding is perfect for you! Historisch Hout offers a variety of wall & ceiling cladding options in its range. Wood is a material that has been timelessly fashionable for years and is ideal for creating wall and ceiling coverings. It has a natural look and adds a lot of atmosphere to a space. One of the benefits of our cladding is that it

provides an exclusive appearance, absorbs sound, and you'll never get tired of the different textures and colors. Each plank is unique and tells its own story. Our barnwood wall & ceiling cladding is available in various sizes, so you can create the perfect look for your space. Whether you choose long planks for a beautiful, continuous look or shorter planks for versatility and playfulness.

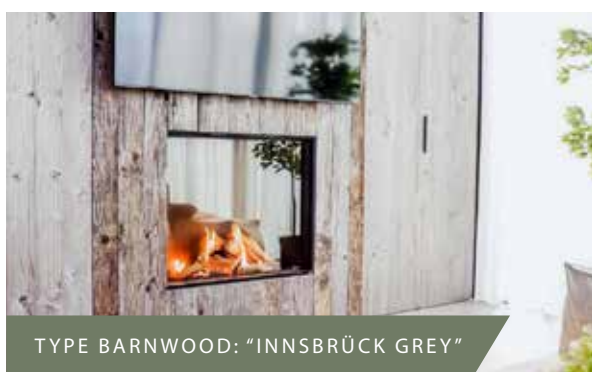

Thanks to the user-friendly dimensions, our barnwood is easy to install.

BARNWOOD SHEET MATERIAL

Exclusive sheet materials in unique colors and textures, these are our barnwood veneer sheets.

Old Oak Veneer Sheets

Decades-old oak beams and planks are re-sawn to produce old oak veneer. The “Sarajevo” sheet is a furniture panel made exclusively from the original outer layer. This outer layer has been beautifully weathered and colored through years of use and exposure to the elements! Sometimes, after the outer layer of an old oak beam, the subsequent layers are also beautifully weathered; these layers show the color of oak but often display traces of nails, black streaks, and weathered knots. These are our “Zadar” sheets!

These panels have an authentic character with unique colors and textures. After various treatments and sorting of suitable reclaimed veneer, the top layers are made to thickness and glued onto a core of birch plywood.

One side of the panel features reclaimed oak veneer, while the other side is finished with European rustic oak veneer. Veneer is a thin layer of wood bonded to the panel, resulting in a stable sheet suitable for many interior applications.

We can produce these panels to custom sizes in larger quantities, helping to save unnecessary waste.

Softwood Veneer Sheets

Softwood from Austria, sourced from abandoned field barns in the high mountains of the Alps. Due to the extreme weather conditions the planks have endured, the wood is marked by nature! No two planks are the same.

The top layer of these furniture panels once served as exterior cladding for old farms and barns in the Austrian Alps. As a result, these softwood sheets have an authentic appearance and can be well combined with modern interiors. We offer these panels in the barnwood types: “Innsbrück Brown” & “Innsbrück Grey”.

BARNWOOD FLOORS

Have you always dreamed of a barnwood floor? With us, you will find a unique selection of barnwood floors that give any space an authentic and atmospheric appearance. The most common choice is our engineered planks. These floorboards consist of a birch plywood base, combined with a solid oak top layer of about 5 mm thick. As a result, the engineered planks have a total thickness of 17-18 mm. Thanks to this construction, they can be directly and fully glued to the subfloor. This not only ensures a stable floor but also provides optimal performance for underfloor heating.

Engineered and Solid Wood Floors

In addition to engineered planks, we also offer solid barnwood floors. Solid wood floors are made entirely from one piece of sawn wood. While these floors have an unmatched charm, they are less suitable for use with underfloor heating. Our barnwood, shaped by decades of exposure to the elements, has developed unique colors and textures.

We offer our engineered barnwood floors in two main variants: **“Belgrade”** – These planks retain the original rough

texture of the outside of the old floorboards, giving them an authentic and robust appearance.

“Zadar” – These planks are sanded and/or brushed, resulting in a lighter color. The colors vary from golden brown to darker shades with visible cracks and nail holes, creating a warm and rustic atmosphere. A barnwood floor brings a unique ambience to any room. The beautiful colors and characteristic appearance make it a popular choice. The floorboards mainly come from historical buildings in the Balkans, such as old grain stores, farmhouses, and government buildings. Due to their years of natural drying, these planks are very stable and durable.

Patterned Floors

Our reclaimed oak engineered planks are not only available in straight planks but also in stylish patterns such as herringbone, Hungarian point, and Versailles panels. These patterns provide endless opportunities to give your interior a luxurious and timeless look.

With our barnwood floors, you choose authenticity, sustainability, and a unique atmosphere for your home or project.

TYPE BARNWOOD: “BELGRADE”

BARNWOOD DOORS

That's what our custom-made old oak doors are all about. Each door is unique and adds charm and warmth to the space it occupies. Wooden doors fit perfectly in interiors where natural materials add a warm and atmospheric touch. Variations in color and texture are inherent to the material. Grain, knots, color differences, structural differences, and cracks in the wood are characteristic of barnwood.

Our barnwood interior doors are crafted from old, weathered wood combined with a stable MDF core. By using dried barnwood veneer, which is glued on both sides to a stable door core, we create a door that looks solid yet is stable and resistant to warping. The edges of the door cores are finished with a solid oak edge. Our exterior doors feature a "Aluplex" core, 40 mm thick. By gluing the solid barnwood veneer onto this

core, we create a front door that appears solid but remains stable and definitely not prone to warping.

Barnwood Wood

Barnwood is a collective term for old wood originally used to build and clad barns. By reusing this wood, we create a sustainable product! Our old wood can be up to 200 years old! Over the years, the planks have been exposed to the harshest weather conditions, giving the wood a weathered appearance and making it ideal for reuse. That the wood has been lived in does not mean it is worn out. On the contrary, it has matured over time, making it perfect for furniture and doors. Due to years of natural drying, the wood has become highly stable.

Our doors are fully customizable and available in various styles. With a barnwood door, you choose a unique, sustainable, and character-rich product.

TAILOR MADE STEPS

Historisch Hout has a large stock of old oak from which we produce stair treads, these steps can be cut in almost any thickness and length. We supply stair treads up to +/-25 cm wide in one piece, and we also produce assembled stair treads from old oak, which allows us to supply wide stair treads for spiral staircases or stair platforms. We can produce these treads in various designs such as brushed old oak or planed old oak. Appearance of stair treads For stair treads, we have 2 designs, namely our

barnwood type 'Sarajevo' and our barnwood type 'Zadar'. The stair steps made of barnwood 'Sarajevo' have the original rough texture of the original outside of an old oak beam. The stair steps made from barnwood 'Zadar' have a smooth, sanded and/or brushed 'inside'. Solid steps and overlay steps We supply both solid stair steps and overlay steps. Overlay steps are mostly used in renovation projects. For the assembly of the end product, we are happy to put you in contact with professionals who can realise your desired end product from our materials.

TAILOR MADE FURNITURE PANELS

At Historisch Hout, we create unique furniture panels from authentic barnwood varieties.

These panels are crafted from carefully selected reclaimed wood, giving every interior a warm and distinctive character. Our furniture panels are perfect for a wide range of applications, such as cabinet fronts, window sills, and other custom furniture pieces.

Sustainability is at the heart of our work. By giving old wood a second life, we contribute to a circular economy and reduce the demand for newly harvested timber. Our furniture panels are produced using traditional craftsmanship, with attention to

detail and quality. Each panel is unique, featuring visible traces of history, such as grain patterns, cracks, and authentic discolorations that tell a story.

Additionally, we offer customization options for our furniture panels. Looking for a specific finish, color, or texture? Our experts are happy to collaborate with you to create a solution that seamlessly fits your interior or project.

Curious to see how our furniture panels look in a finished space? Visit our showroom or explore our online portfolio, where you'll find countless inspiring examples of how our barnwood comes to life in modern, classic, and industrial interiors.

TAILOR MADE

DINING TABLES

At Historisch Hout, we create unique tabletops from authentic barnwood. Each tabletop is carefully crafted from sustainably reclaimed wood, making your table not only a stylish but also an eco-friendly choice. We customize our tables to perfectly match your interior and preferences. Whether you're looking for a rustic oak tabletop with a weathered look or a sleek, smooth finish, we can bring your vision to life.

Our tabletops are ideal not only for home use but also for commercial projects in the hospitality sector. Whether it's tables for a restaurant, hotel, café, or meeting space, we

provide high-quality, character-rich tabletops designed to withstand heavy use. We are happy to collaborate with you to find the best solutions for your project, ensuring a result that is both functional and visually striking.

Curious about our reclaimed oak dining tables? Visit our showroom or contact us to discuss the possibilities. We're ready to bring your ideas to life and create a table that perfectly suits your style and needs.

With Historisch Hout, you bring home a unique blend of history, craftsmanship, and sustainability.

TAILOR MADE DECORATIVE BEAMS

Our decorative beams are the perfect way to add character and atmosphere to your interior.

With us, you can have various custom-made beams crafted to perfectly match the style of your space. We create the beams with angled joints, ensuring a neat finish and a realistic appearance. The difference between our beams and real wood beams is almost imperceptible, making them not only beautiful but also highly authentic.

Decorative beams are often used to conceal steel structures, such as visible beams or other technical elements in the interior. This provides a neat and authentic finish while keeping the technical elements out of sight without affecting the overall look of the room. With our custom-made decorative

beams, you can achieve this in an authentic way.

We offer our decorative beams in two popular barnwood types: "Zadar" and "Sarajevo." The "Zadar" barnwood type features a cleaner finish, with subtle details that give it a modern look. On the other hand, the "Sarajevo" barnwood type has a more robust, weathered appearance with more visible textures and character, giving it a warm, rustic charm.

Whether you choose the refined look of "Zadar" barnwood or the more rugged appearance of "Sarajevo" barnwood, our decorative beams are fully customizable and offer a sustainable solution for your interior. The use of barnwood ensures that the beams are not only beautiful but also an environmentally friendly choice.

CIRCULAR

RECLAIMED WOOD

At Historisch Hout, sustainability is at the heart of what we do. Recycled wood is a unique product that not only contributes to a better environment but also tells a piece of history. The wood we use comes from old buildings, barns, and other structures that are sometimes centuries old. Instead of letting this

wood decay or burn, we give it a second life.

This reuse seamlessly aligns with the principles of the circular economy, where waste is minimized, and resources are used to their full potential.

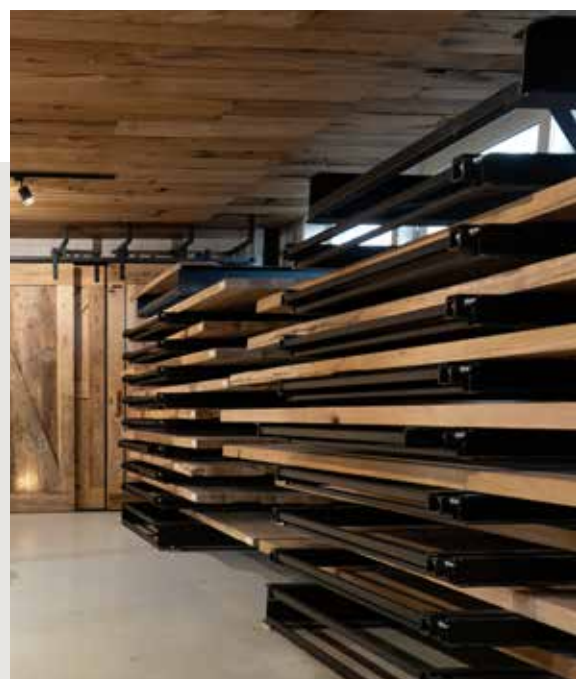

SHOWROOM

WOOD SHED

Visit our showroom and discover the unique charm of our barnwood! Here, you can see for yourself the beautiful products we offer, from robust tables and atmospheric wall paneling to characterful beams and custom-made panels.
